

Injury Advice Disclaimer

We make every effort to ensure that we accurately represent the injury advice and prognosis displayed throughout this site. However, examples of injuries and their prognosis are based on typical representations of those injuries that we commonly see in our physiotherapy clinics. The information given is not intended as representations of every individual's potential injury. As with any injury, each person's symptoms can vary widely and each person's recovery from injury can also vary depending upon background, genetics, previous medical history, application of exercises, posture, motivation to follow physio advice and various other physical factors. It is impossible to give a 100% complete accurate diagnosis and prognosis without a thorough physical examination and likewise the advice given for management of an injury cannot be deemed fully accurate in the absence of this examination from one of the Physical Therapists at Treasure Coast Physical Therapy and Fitness. We are able to offer you this service at a standard charge. Significant injury risk is possible if you do not follow due diligence and seek suitable professional advice about your injury. No guarantees of specific results are expressly made or implied on this web site.
